

Information relating to REACH

Information relating to Regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

According to the REACH regulation all chemical substances produced in amounts of more than 1 ton per year may only be marketed within the European Union if they have been pre-registered or registered.

Bahr Modultechnik GmbH does not produce any chemical substances.

Bahr Modultechnik GmbH is a downstream user within the meaning of the EU Regulation, since it is not a manufacturer, importer or distributor of chemical products. The chemicals used by us (e. g. lubricants and greases) do not reach the threshold of 1 t/year under any circumstances, so that we are not required to prepare any technical dossiers in this regard according to the EU Regulation.

To ensure that we keep within the limits of the Regulation, we maintain an expanded list of chemical agents and hazardous substances to record and regularly update the annual amounts of chemicals used.

If you have any questions, please do not hesitate to contact us.
